👤 About Me

Results-driven software engineer specialized in AI & Big Data, full-stack development, and deployment. Experienced across the full development cycle (frontend, backend, data, DevOps) with a strong focus on industrialization, quality, and performance. Currently pursuing a Master's in Big Data & AI (evening classes), I design scalable, elegant, and user-centered digital solutions.

</> Skills

Python Django FastAPI Flask Laravel React Native Next.js JavaScript HTML/CSS TailwindCSS

SQL MySQL PostgreSQL MongoDB Pandas NumPy Docker cPanel Vercel Render SEO

Scraping Selenium Streamlit Data Visualization

💼 Professional Experience

Tech Lead & Freelance Full-Stack Developer — EEUEZ Group

- Designed and developed EEUEZ-Market (Laravel, e-commerce): backend architecture, frontend integration, SEO optimization.
- Built Zevaba (Django): intellectual social network, deployed via cPanel.

Tech Lead & Full-Stack Developer — Mubaku

- Led technical development of Loan Appraisal App (Django). Contributed to frontend/backend, CI/CD, and deployment.
- Designed Mubaku HighTech responsive landing page.

Freelance Web Developer — On Black Streetwear

on-black.vercel.app: online store & showcase site (React/Tailwind), orders via WhatsApp.

Data Analyst & Web Developer — NAUMUR SARL

Data cleaning, consolidation & visualization (Excel/Flourish/SharePoint); website naumur.vercel.app.

Internships & Early Experience

- BEAC — Internal Digital Transformation (2022–2023).
- AZ Corporation — Software Performance Optimization (2021–2022).
- Efoulan District Hospital — Technical Support (2021).
