PROFESSIONAL SUMMARY

Data engineer with a software-engineering foundation (5+ years in Python) and an MSc in Big Data & AI. I build ETL pipelines that turn large, messy datasets into reliable data products and dashboards — cleaning, deduplication, classification, enrichment and modelling. Hands-on with the modern batch/stream stack (Spark, Kafka, MinIO, Docker) and with BI tooling (SSIS, SSAS, Power BI, Streamlit).

CORE SKILLS

Languages	Python (Pandas, NumPy), SQL, PySpark
Pipelines	ETL/ELT, data cleaning, deduplication, validation, batch & streaming, orchestration
Big Data	Apache Spark, Apache Kafka, MinIO (object storage), Docker & Docker Compose
Modelling & BI	Dimensional modelling (fact/dimension, surrogate keys), SSIS, SSAS, Power BI, Streamlit, Flourish
Storage	PostgreSQL, MySQL, MongoDB, SQLite; indexing, query optimisation, migrations
Field data	KoboToolbox / KoboCollect — form design, offline survey collection, data export & cleaning pipelines
Cloud/DevOps	AWS EC2, Git, CI/CD
AI for data	LLM-assisted classification, extraction & enrichment in pipelines; local inference with Ollama & LM Studio (Gemma, Mistral, Qwen, Kimi) for private, on-prem data

EXPERIENCE

Data Analyst & Web Developer — NAUMUR SARL, Yaoundé — **Oct 2025 – Jan 2026**

- Built ETL routines in Python/SQL to consolidate survey and institutional data from multiple sources into a reporting model.
- Produced data-visualisation dashboards (Streamlit / Flourish) used for institutional decision-making.
- Handled data quality: deduplication, normalisation, validation rules.

Innovation Cell Lead — NAUMUR SARL, Yaoundé — **Feb 2026 – Present**

- Evaluate and prototype data-platform and analytics tooling; manage AWS infrastructure hosting data workloads.

Tech Lead & Full-Stack Developer — EEUEZ Group / Mubaku — **Sept 2024 – Aug 2025**

- Designed relational data models for marketplace, social and fintech products (PostgreSQL / MySQL), including migrations and indexing for performance.
- Implemented scoring logic over transactional data for loan appraisal.

SELECTED DATA PROJECTS

- **Big Data Pipeline** — end-to-end stack: ingestion → **Kafka** → **Spark** processing → **MinIO** storage → analytics/BI, containerised with Docker Compose.
- **DUMP — business & prospecting data platform.** Ingest hundreds of thousands of business/contact records; clean, deduplicate, classify by sector, enrich with digital-presence signals, compute a lead score, then feed downstream sales workflows.
- **Institutional BI** — dimensional model (fact/dimension tables, time dimension, surrogate keys) with SSIS/SSAS and Power BI reporting.

EDUCATION

MSc, Big Data & Artificial Intelligence — Keyce Informatique & IA, Yaoundé (2024 – 2026)
BSc, Computer Engineering — IAI Cameroun (2019 – 2023)
GCE Advanced Level — Laval Bilingual School (2020)

LANGUAGES

French — fluent (native-level) | English — fluent

INTERESTS

Reading, sport, music.
