PROFESSIONAL SUMMARY

Engineer who turns emerging technology into working prototypes. Currently leading an innovation cell: scanning GenAI, agents and automation, running fast build-measure-learn loops, and moving the promising ones toward production. Strong full-stack base (5+ years, 20+ projects) means prototypes are real software, not slideware.

CORE SKILLS

R&D practice	Technology scouting & evaluation, rapid prototyping, proof-of-concept design, feasibility analysis, build-measure-learn
Focus areas	Generative AI, LLM agents & multi-agent systems, local / offline LLMs (Ollama, LM Studio — Gemma, Mistral, Qwen, Kimi), AI automation, image recognition, super-app / platform concepts
Build stack	Python, FastAPI, Django, React/Next.js, Streamlit, Docker, AWS EC2
Automation	Selenium, web scraping, BeautifulSoup, Requests, API integration, KoboToolbox / KoboCollect (field data collection)
Leadership	Team mentoring, hackathon organisation, roadmap definition, stakeholder communication

EXPERIENCE

Innovation Cell Lead — NAUMUR SARL, Yaoundé — **Feb 2026 – Present**

- Set and run the innovation agenda: evaluate emerging technologies, select bets, and prototype AI assistants, automation and internal tools.
- Manage cloud infrastructure (AWS VMs) and Microsoft 365; supervise and mentor an engineering team.
- Bridge business needs and technology, translating problems into experiments with measurable outcomes.

Organiser — EEUEZ Hackathon 2026 — Campus des Grandes Écoles Européennes — **Feb 2026**

- Conceived and coordinated the event; mentored participating teams; managed digital presence and communications.

Tech Lead & Full-Stack Developer (Freelance) — EEUEZ Group — **Mar 2025 – Aug 2025**

- Prototyped AI modules (support chatbot, image/ingredient recognition) alongside production e-commerce and social platforms.

Data Analyst & Web Developer — NAUMUR SARL — **Oct 2025 – Jan 2026**

- Prototyped LLM-assisted data classification and analytics dashboards later adopted for institutional reporting.

RESEARCH & PROTOTYPE PROJECTS

- **Wak** — local multi-agent AI ecosystem: a coordinator agent orchestrating specialised agents on offline LLMs (Ollama, LM Studio — Gemma, Mistral, Qwen, Kimi). Explores agent roles, tool use and orchestration.
- **Karaavel** — multi-service super-app concept for African markets: shared auth/wallet/notification services plus an AI module (chatbot, ingredient recognition, shopping-list generation).
- **DUMP** — AI prospecting engine: dataset → classification → lead scoring → personalised outreach → human approval → follow-up → learn from results.
- **Local-LLM experiments** — benchmarking Gemma, Mistral, Qwen and Kimi on Ollama / LM Studio (latency, quality, hardware fit); published on Hugging Face.

EDUCATION

MSc, Big Data & Artificial Intelligence — Keyce Informatique & IA, Yaoundé (2024 – 2026)
BSc, Computer Engineering — IAI Cameroun (2019 – 2023)
GCE Advanced Level — Laval Bilingual School (2020)

LANGUAGES

French — fluent (native-level) | English — fluent

INTERESTS

Reading, sport, music.
