PROFESSIONAL SUMMARY

Software engineer and technical lead who designs modular, scalable digital ecosystems — not isolated apps. 5+ years and 20+ projects spanning e-commerce, fintech and SaaS, with recurring responsibility for architecture: service decomposition, API contracts, shared platform services (auth, wallet, notifications), data modelling, integrations and deployment. Now leading an innovation cell and setting technical direction.

CORE SKILLS

Architecture	Solution & application architecture, modular monolith / service decomposition, event-driven design (Kafka), shared platform services, C4-style diagrams
APIs & integration	REST API design, versioning, webhooks, OAuth/JWT, HMAC-signed callbacks, payment gateways (NotchPay, Mobile Money)
Backend	Python (Django, DRF, FastAPI), PHP/Laravel, Node.js
Data	PostgreSQL, MySQL, MongoDB; data modelling, indexing, migrations, KoboToolbox / KoboCollect
Platform	Docker & Compose, AWS EC2, CI/CD, Vercel/Render, environment & secrets management
AI architecture	LLM features with a local/hosted split — on-prem inference (Ollama, LM Studio; Gemma, Mistral, Qwen, Kimi) for data-sensitive workloads, hosted APIs elsewhere
Leadership	Tech selection, technical planning, code review, team supervision, stakeholder alignment

EXPERIENCE

Innovation Cell Lead — NAUMUR SARL, Yaoundé — **Feb 2026 – Present**
- Own technical direction for internal software: architecture decisions, technology evaluation, cloud (AWS) and M365 administration.
- Supervise an engineering team; define standards for API design and deployment.

Tech Lead & Full-Stack Developer (Freelance) — EEUEZ Group — **Mar 2025 – Aug 2025**
- Designed the architecture of a multi-vendor marketplace and a social platform: data models, REST APIs, auth, admin, deployment topology.
- Defined shared components reused across the EEUEZ product family (Market, Menu, Job).

Tech Lead & Full-Stack Developer — Mubaku — **Sept 2024 – Feb 2025**
- Architected a loan-appraisal application: role-based access, scoring workflow, transactional data model; provided technical oversight to the team.

Data Analyst & Web Developer — NAUMUR SARL — **Oct 2025 – Jan 2026**
- Designed the reporting data model and deployment pipeline for the institutional platform (Next.js, AWS).

ARCHITECTURE PROJECTS

- **Karaavel — super-app architecture.** Shared services (authentication, wallet, notifications, core platform) consumed by independent business units (marketplace, restaurant, supermarket, loans) plus a cross-cutting AI module. Focus: bounded contexts, API contracts, payment integration.
- **EEUEZ ecosystem.** Family of connected products (Market, Menu, Job) sharing identity, design system and integration patterns.
- **Payment & wallet integration.** Gateway integration with webhooks, HMAC signature verification, idempotent transaction handling, Mobile Money flows.
- **Big Data Pipeline.** Event-driven ingestion (Kafka) → Spark processing → MinIO → analytics, containerised.

EDUCATION

MSc, Big Data & Artificial Intelligence — Keyce Informatique & IA, Yaoundé (2024 – 2026)
BSc, Computer Engineering — IAI Cameroun (2019 – 2023)
GCE Advanced Level — Laval Bilingual School (2020)

LANGUAGES

French — fluent (native-level) | English — fluent

INTERESTS

Reading, sport, music.
